This report focuses on the vulnerable adolescent ages of 10 through 18 when most users start smoking, chewing, or dipping & become addicted to tobacco. It examines the health effects of early smoking & smokeless tobacco use, the reasons that young men & women begin using tobacco, the extent to which they use tobacco, tobacco advertising & promotional activities (history of cigarette advertising to the young); & efforts to prevent tobacco use by young people (public opinion; educational efforts; & public policies). Charts, tables & graphs. Glossary. Index.
As the nation's drug crisis has deepened, public and private agencies have invested huge sums of money in prevention efforts. Are the resulting programs effective? What do we - What Do We Know? - 155 pages - Committee on Substance Abuse Prevention Research, Commission on Behavioral and Social Sciences and Education, Division of Behavioral and Social Sciences and Education, National Research Council - Jan 15, 1993
